ADDITIONAL INFORMATION SUPPORTING NJD (e.g., paragraph 1 – site conditions; paragraphs 2-3 – rationale used to determine NJD, including information reviewed to assess potential navigation or interstate commerce connections; and paragraph 4 – site information on waters of the U.S. occurring onsite): The site is part of a gold mine operation, was created by disposal of mine waste in a dry draw, it is a seasonal wetland approximately 0.75 acres in size and will have a detention pond encompass it entirely, the creation of the wetland was by disposal of rock waste and there is not surface hydraulic connection to waters of the US, it has no valid ICC and it is not navigable.
